

Young Investigators' Colloquium

18:15 Uhr
Blauer Turm, Haus 89, Seminarraum EG
Heinrich-Hoffmann-Str. 7, Campus Niederrad

- | | | |
|-----------------------|---|---|
| 23. April 2009 | Florian Beißner
<i>(Neurology, Brain Imaging Center)</i> | Imaging of autonomic centers in the human brainstem using fMRI and its application to acupuncture research |
| | Oliver Döhrmann
<i>(Medizinische Psychologie, AG Kaiser)</i> | Objects, meaning, and the brain: Neuroimaging studies on the impact of semantics on auditory and audio-visual integrative processing |
| 14. Mai 2009 | Dr. Caroline Möller
<i>(Neurology, AG Ziemann)</i> | The temporal dynamics of TMS-induced plasticity in human motorcortex |
| | Dr. Junmei Zhu
<i>(FIAS, AG von der Malsburg)</i> | The dynamics of invariant object recognition |
| 18. Juni 2009 | Dr. Ekaterini Copanaki
<i>(Clinical Neuroanatomy, AG Deller)</i> | Neuroprotective role of sAPPalpha in hippocampal slice cultures |
| | Dr. Sato Yasuomi
<i>(FIAS, AG von der Malsburg)</i> | A Theoretical Approach on Temperature Dependent Synchronization in Two-Neuron System |
| 16. Juli 2009 | Aycan Senturk
<i>(Cell Biology and Neuroscience, AG Acker-Palmer)</i> | EphrinB ligands are coreceptors for Reelin signaling |
| | Dr. Gordon Pipa
<i>(MPIH, Neurophysiology & FIAS)</i> | Spike encoding is more complex than suggested by receptive fields |

Guests are very welcome!

After the colloquium: Discussions continued with pretzels and drinks in the foyer
