

# Kolloquium

## Wintersemester 2018/2019

Fachbereich Biowissenschaften  
Institut für Zellbiologie und Neurowissenschaft

---

Biologicum  
Max-von-Laue Str. 13  
Hörsaal 1 (-1.202)

Beginn: 12:15 Uhr

---

- 30.10.18 **Dr. Renaud Legouis**  
Departement Biologie Cellulaire, L'Institut de Biologie Intégrative de la Cellule, Paris  
***„From Fertilization to Cell Death : Developmental Autophagy in *C. elegans* Embryo”***
- 13.11.18 **Dr. Michaela Jung**  
Institute of Biochemistry I/Pathobiochemistry  
Faculty of Medicine, Goethe-University Frankfurt  
***“The role of Lcn-2 in determining the macrophage iron phenotype and its impact on breast cancer progression”***
- 27.11.18 **Dr. Francesco Pampaloni**  
Abteilung für Physikalische Biologie, BMLS, Goethe Universität Frankfurt  
***“High-content imaging of organoids and spheroids with light sheet microscopy for cancer biology and regenerative medicine”***
- 11.12.18 **Dr. Nicole Angenstein**  
Leibniz-Institut für Neurobiologie, Magdeburg  
***“Lateralized Processing in Human Auditory Cortex”***
- 22.01.19 **Prof. Dr. Olivier T. Guenat**  
ARTORG Center for Biomedical Engineering Research, Bern  
***“Organs-on-Chips: the next generation in-vitro models”***
- 05.02.19 **Dr. Cyril Hanus**  
Biogenesis and dynamics of dendritic proteins, CPN, Universität Paris  
***“Compartmentalised secretory processing in neuronal dendrites”***
